

## Modification Information | ASI Mod

MAY 28 2010

---

### Overview

#### **ELS - Emergency Lighting System**

Version: **V4-R2.38**

Compatibility: **GTAIV V1060**

Requirements: **ELS-enabled vehicle models**

---

### Installation

Depending on which version of GTAIV you have, select the correct VERSION folder from the download package and place **its contents** inside your main GTAIV game directory.

Open and edit the ELS.ini file in order to customize the ELS according to your needs.

---

### Notes

This file was originally released at [www.GTAPOLICEMODS.com](http://www.GTAPOLICEMODS.com).

The ELS can only work correctly on ELS-enabled vehicles (which can be downloaded at the website listed above).

The ELS is active on all vehicles by default. Active = 1 means that the ELS is active for that given vehicle, whereas Active = 0 means that the ELS will not work with that vehicle.

Should you wish to enable vehicles not listed in the ELS.ini file, simply add a new section with the desired vehicle's name (as it is shown in the vehicles.ide file), emulating the existing sections.

Some controls (such as browsing flash patterns) require that the ELS display panel be on (Alt+M by default) in order for them to take effect.

An edited VisualSettings.dat file has been provided. This file enhances the luminosity of ELS lights and makes for a much more realistic and enjoyable ELS experience.

ELS V4 may require you to download and install .Net Framework 4 and the Microsoft 2010 C++ library. They can be found respectively at the two links listed below:
